

# SKATE CANADA PEI

## RETURN TO SKATING 2021-22 SEASON

GUIDEBOOK | PUBLISHED OCTOBER 22, 2021

## RETURN TO SKATE

---

The 2021-22 season has begun!  
Skaters across the island are back on the ice for practices, test days & competition again.  
This document will serve as an ever-changing guidebook to our Return to Skate protocols in PEI and will be updated as needed.

## KEY UPDATES:

---

### **Cohort Limits:**

For organized cohorts, you can have up to 200 people indoors. During short periods of interaction at entry/exit points, washrooms and concessions physical distancing should be maintained.

### **Contact Tracing:**

There is no need to continue contact tracing (where proof of vaccination is required)

### **Masks:**

Although not mandatory we recommend coaches to wear a mask when social distancing is not possible, especially when working with skaters under the age of 12 who are not eligible to be vaccinated yet. Skaters do not have to wear masks when on the ice but must continue to wear them off the ice including in the dressing room. **Synchro** skaters should wear masks while practicing. Exemption for simulations/competitions in place. Spectators must continue to wear non-medical masks indoors.

### **Vaccine Passport:**

All Coaches & Volunteers must provide proof of vaccination. Spectators must provide proof of vaccination before entering facilities across the island \*subject to each facilities rule\*

Participant proof of vaccination is required (18 years and younger are exempt)

If the group includes a combination of 18 and under and 19 and over all participants must show proof of vaccination.

Vax Pass QR Codes are available as of October 22.

**\*\* Any club has the right to increase these precautions as they feel necessary\*\***
